

Introduction

Token Management Platform enables a quick implementation of multiple tokenization solutions. It will help you launch your Apple Pay or Google Pay program in maximum 2-3 months at an affordable price. Tokenization is available globally and can be delivered by Verestro to any bank, financial institution or fintech.

Key features:

- The platform is integrated with Mastercard MDES and VISA VTS.
- Full certification of Mastercard, VISA, Apple Pay, Google Pay, Samsung Pay, X-Pays.
- Enables all mandatory and optional processes required by payment schemes.
- Simplifies encryption mechanisms required by X-Pays.
- It can be hosted by Verestro in private cloud in EU or on AWS or Azure at any location in the world.
- Full coverage of Apple mandatory requirements and certifications.
- Platform includes Administration Panel for token management.
- Token Connect and MDES-4-Merchants can be included into the project scope.
- Guaranteed implementation time - 3 months.

Please check product overview and technical APIs for more details about the product.
