

Verestro architecture and choice of products

Below simplified example of Verestro platform architecture. Before every project please decide which functionalities are you going to use.

[image.png](#)

Please tick bullet points which are needed in your project and deliver it to our sales team:

☐ **INTERFACE**

- ☐ White-label app
- ☐ White-label web
- ☐ SDKs - android and iOS, to minimise PCI issues
- ☐ APIs

☐ **CORE**

- ☐ eKYC - are you going to register consumers? do you have own KYC solution or want to use ours?
- ☐ eKYB - are you going to register business customers? do you have own KYB solution or want to use ours?
- ☐ Data Core (any user data will be delivered to Verestro) - almost always needed
- ☐ Balance
- ☐ Card - do you want to use our issuing processing capabilities or you have another issuing processor
- ☐ Transaction History

☐ **RECEIVE MONEY**

- ☐ IBAN for receiving
- ☐ Receive to card
- ☐ eCommerce gateway - do you want to use our acquirer or you have another acquirer? which ways of payments?

- ☐ Other partner assets - do you want to reload cards with points, digital assets etc.
- ☐ **SEND MONEY**
- ☐ Payout to Card - sending money to any VISA or Mastercard card?
- ☐ SEPA transfers
- ☐ Internal transfers between our accounts
- ☐ QR payments
- ☐ Other ways of sending money?
- ☐ **PAY TO MERCHANT**
- ☐ Apple Pay
- ☐ Google Pay
- ☐ Own wallet
- ☐ eCommerce payments
- ☐ inApp payments
- ☐ Payments from own wallet
- ☐ ATM
- ☐ **CARD BENEFITS**
- ☐ Point-based loyalty
- ☐ Fee management
- ☐ Donations
- ☐ Cash back
- ☐ Vouchers
- ☐ Carbon Calculator
- ☐ Invoice management
- ☐ User groups

We are constantly adding new value added functionalities. Check if we have not added something new in the meantime :) Contact us.
